

Family Information Card

ST Math is going to help your students be better at solving problems. To help them, here are some hints:

Your child is learning to be a problem solver. As a problem solver it is important for them to figure things out for themselves.

Questions to help your child figure it how to solve the puzzle:

- What do you notice about the puzzle?
- What can you click?
- What do you need to do to get Jiji across the screen?
- What question is this puzzle asking?
- Decide what you will click on to solve the puzzle. Describe what you think will happen when you click?
- Describe what you see after you click. What did you learn?
- What will you do now? What do you expect to see?
- What did you learn from the previous level that can help you here?

You may need to ask these questions several times to help your child think through the puzzle.

Encourage your child to take risks. Ask them to explain what they learn from the wrong answers.

Help your child think about their thinking

- Explain how you solved the puzzle.
- Can you solve it in a different way?
- What math skills are you using to solve the puzzle?
